

The Battle of Neighborhoods | Data Description

Data Description:

Data Link: https://geo.nyu.edu/catalog/nyu_2451_3457

I will use this data to get the neighborhoods of the New York and their coordinates

After that I will use them to make clusters which will clarify the difference between neighborhoods.

Foursquare API Data:

In order to know more informations about my venues inside my neighborhoods I will need to get using foursquare API:

- Venue
- Name of the venue e.g. the name of a store or restaurant
- Venue Latitude
- Venue Longitude
- Venue Category
